## PERSONAL PROFILE

Entry level web developer with strong understanding and experience developing and deploying web-apps. Proficient in both front-end and back-end development. Experience working with NoSQL databases. Dedication to writing legible code, version control, and offering clients dynamic solutions for controlling the content on their web applications. Practices strong leadership and interpersonal skills cultivated throughout my academic career. Currently seeking a career in software development that will allow me to innovate and continue learning.

---

## PROFESSIONAL EXPERIENCE

### Freelance Web Developer

01/2019 – Current

- Currently contracted and developing a website using Django for a local non-profit organization providing support for children with food allergies.
- Used Python, Flask, HTML, CSS to develop an open-source blogging and content management system. Packaged in a no-coding necessary set-up. <https://github.com/domdit/Alambi>
- Developed my personal portfolio website using Flask, Javascript, HTML, CSS. <http://www.domdit.com>
- Contracted to develop a website for a South East Asian catering company with Flask. Includes an admin page allowing the user to update the menus, images, and text on the page. <http://www.sianstreetfood.com>
- Contracted to develop a portfolio website for a Chinese language teacher using WordPress. <http://www.jewelofchina.com>
- Developed a Manchu-English-Chinese dictionary using HTML and JavaScript for my professor during my M.A. degree. <http://www.buleku.domdit.com>
